

Environmental, Health, Safety & Security Policy

Olin is committed to the guiding principles of the global Responsible Care® initiative to drive continuous improvement and achieve excellence in environmental, health, safety and security performance. Our corporate values of *Integrity, Helping Customers Succeed, Continuous Improvement* and *our People* are part of our culture. These values are also reflected in our EHS&S policy and practice. Olin leadership visibly performs and guides the organization to conduct business in a manner that protects and increasingly benefits our employees, business partners and the communities in which we live. All employees have responsibilities within our management systems necessary to sustain our drive to ZERO incidents.

Olin will, in its worldwide activities:

- Commit to meet or exceed all applicable legal, regulatory and other requirements
- Establish objectives and targets that drive continual improvement in environmental, health, safety, process safety, distribution and security management of our people, products, operations and services
- Relentlessly pursue ZERO injuries and adverse environmental and health impacts
- Share information openly with our stakeholders regarding our EHS&S policies, practices and performance and evaluate their input
- Determine the internal and external risks and opportunities that need to be addressed to prevent or reduce undesired effects and achieve continual improvement
- Design and construct new facilities and upgrade or modify current facilities in such a manner as to ensure excellent process safety management and address sustainability and efficiency in our operations
- Be a good steward of Olin products and materials over their life cycle to ensure prudent and safe development, sourcing, production, use, handling, transportation and disposal/recycle

A handwritten signature in black ink, appearing to read "John E. Fischer", is written over a horizontal line.
